În amenajările moderne, din motive de cost sau rațiuni practice, se folosesc frecvent materiale ca plastic, PVC, MDF, fibre sintetice etc., care emit compuși organici volatili și formaldehidă.

De aceea, este indicat să folosim materiale naturale, așa cum este lemnul, și produse pe bază de apă, ca email DURAZIV Fără Miros, pentru decorare. Poate fi folosit atât la interior, cât și la exterior, inclusiv în camere de copii, pentru stupi etc., fiind un produs etichetat Ecolabel.

# DURAZIV Fără Miros

## Zero miros, Zero deranj, 100% Eco!

Zugrăvitul îi face pe mulți să strâmbă din nas pentru că se face deranj și, mai ales, pentru că mirosul iritant de vopsea și vaporii toxici persistă mult timp după aceea. Desigur, poți lăsa ferestrele deschise, dar ce te faci dacă te grăbești să te muți, sau dacă a doua zi trebuie să predai cheia noilor chiriași, sau dacă e iarnă, sau dacă e o clădire fără ventilație naturală, sau un salon de spital din care nu ai unde muta pacienții?

## Ce spun consumatorii?
